## Crops Information

### Wheat

Season : Rabi (Winter)

flip

### Description

Wheat is a cool-season grass and the second most important cereal crop in India after rice. It requires a cool growing season and bright sunshine at the time of ripening. It thrives best in well-drained loamy soil and is the staple food for a large part of the population, particularly in North and North-West India. It is rich in carbohydrates and is used to make flour for chapatis, bread, biscuits, and pasta.
